

Meet the Doctor

Dennis K. Olivero, DVM

Diplomate of the American College of
Veterinary Ophthalmologists

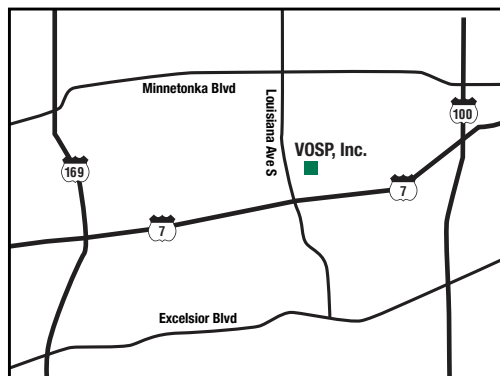

Dr. Olivero has received a Bachelor of Arts degree from Luther College, Decorah, Iowa. He then graduated from veterinary school with honors at the University of Minnesota College of Veterinary Medicine in St. Paul, MN. After serving one year as a small

animal medicine and surgery intern at the University of Minnesota College of Veterinary Medicine, Dr. Olivero completed a residency in comparative ophthalmology at North Carolina State University College of Veterinary Medicine. During that time, Dr. Olivero's research interests were pharmacology of the canine eye, disease of the lens in cats, and artificial lens implants for dogs. The results of his research projects have been published in numerous veterinary journals. He has also co-authored various other papers found in the veterinary literature. Dr. Olivero attained board certification status with the American College of Veterinary Ophthalmologists in 1991. Dr. Olivero has served on staff at the University of Minnesota Medical School and Veterinary College.

Directions

Veterinary Ophthalmology Specialty Practice
is located at 3340 Republic Ave., Suite 150
St. Louis Park, MN 55426

This is inside the Anderson Company Building which is roughly located at the intersection of Hwy 7 and Louisiana Ave between Hwy 100 and Hwy 169

From Hwy 100: Take exit for Hwy 7 west to the Louisiana Ave exit. Go through first roundabout and follow Louisiana Ave. At the immediate next roundabout, take the first exit to the right and travel east on Walker St one block and turn left onto Republic Ave. Parking is in front of the building entrance.

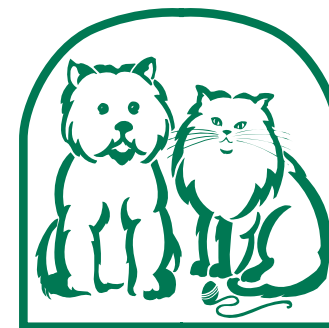

From Hwy 169: Travel east on Hwy 7 towards Minneapolis. Take the Louisiana Ave exit to the first roundabout. Follow Louisiana north which is the fifth spur off of the roundabout. Go under Hwy 7 traveling north and proceed straight through the next roundabout. At the third roundabout, take the first spur to the right to Walker St and continue east one block to Republic Ave. Parking is in front of the building entrance.

SPECIALTY PRACTICE, INC.

Animal Eye Clinic

**A referral specialty practice
limited solely to surgery
and medicine of
animal eye disease**

www.PetEyeClinic.com

Who We Are

Veterinary Ophthalmology Specialty Practice is a referral specialty practice that is limited solely to the diagnosis and treatment of animal eye disease. No general veterinary care is performed. Just as your

own doctor might refer you to a specialist for certain conditions, your veterinarian has recognized a problem that requires specialized tests, equipment, or treatments that can be better handled in a practice dedicated only to your pet's eyes. Your veterinarian's concern for your pet is the reason you have been referred; therefore, we will keep him/her informed of your pet's particular case.

To insure that your pet receives the highest quality of eye care available, Dr. Olivero is a "board certified" veterinary ophthalmologist. This means that after veterinary school he has completed a rigorous 3 year post-doctoral training program devoted to the study of medicine and surgery of all species of animal eyes.

Our Policy

The practice is limited to surgery and medicine of animal's eyes. No other type of veterinary care is available. **VOSP is independent of all other emergency services, private practices and other referral centers.**

Appointments

Patients are seen by appointment only. The eye examination is not routine, but tailored to the patient's symptoms and ocular findings. The initial appointment will include time for a medical history and specialized treatment as needed. The first visit usually takes 30-45 minutes, but can take longer if dilation or other special procedures are required. Please bring all eye medications your pet has received along with any other medications (e.g. heart pills). Due to the large number of patients we treat, every attempt is made to see appointments on time. Therefore, we kindly ask new cases to arrive 10 minutes early to provide pertinent client and patient information.

Fees

Medical and surgical fees may be higher than at your family veterinarian. This is due to the expense of purchasing and maintaining specialized equipment, operating a specialized facility, and the general nature of the service we provide. The fees for services are usual and customary charges for the kind of specialized services rendered and are comparable to those of other board certified veterinary ophthalmologists across the United States.

An estimate of expenses will be given during the initial consultation. Fees are payable in full at the time of service or when your animal is discharged. Payment can be made by cash, debit card, visa or mastercard.

Referring Veterinarian

Your veterinarian will be kept informed of your pet's case after each visit. Please be sure that

his or her proper name and address is given to the receptionist so that the report is received by your veterinarian. Remember, your doctor will administer your pet's primary health care for many years to come. The act of referring a difficult ophthalmologic case exemplifies your veterinarian's concern for your pet.
